

Heavy Duty

SELF-DUMP BUCKET

***Turns your Forklift
into a Loader***

**NOW AVAILABLE
IN 3 SIZES
1/4, 1/2 & 3/4 cu yd**

Model 1445SD shown

Slips on the forks – Installs in minutes

no modification to forklift required

**Load sand, gravel, mulch or
most any loose material.**

**Rope Release
trips bucket.**

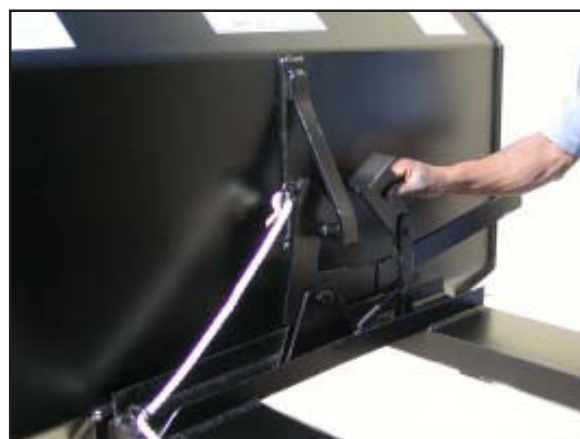

The **Self-Dump Bucket** is perfect for anyone that wants to load loose materials and owns a forklift but doesn't own a loader. Installation is quick and easy. The bucket simply slips on the forks – no hydraulics – no modifications to the forklift.

The $\frac{1}{4}$, $\frac{1}{2}$ or $\frac{3}{4}$ cu yd. capacity is an ideal size for the masonry supply, landscape supply or anyone that wants to load small quantities of sand, top soil, mulch, landscape materials, etc. It is also great for clean-up work around an equipment or supply yard.

Operation is simple, after disengaging the safety lock the bucket can be tripped with the handle at the back of the bucket or from the operator's seat with the remote rope release. Lowering the bucket to the ground resets the bucket for the next load.

Heavy duty construction and a dependable trip mechanism ensures long trouble-free life. An affordable low cost makes this bucket easy to justify even for the occasional user.

Safety Lock prevents accidental tripping of bucket during transportation.

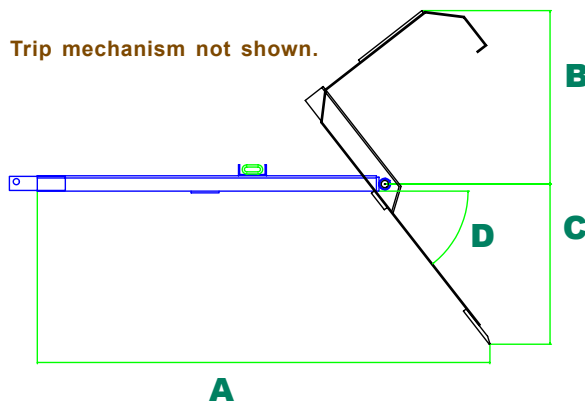

Illustration shows bucket in dump position.
